

**Spectrum  
Glass**

**Multi-Purpose Rosebud  
Dish or Plain Fluted Dish**

*By CKE Publications  
Olympia, Washington*

**Pattern of the  
Month**

Use this dish to hold a special candle, a dried flower arrangement, a favorite shell collection, and much more. It will serve beautifully as a plant saucer if the inside lines are coated with silicone sealer. Do not however, use the dish for food of any sort.

**Instructions:**

1. Cut glass to make four sides and one base piece. For rosebud dish, cut the inside dotted lines, ignoring the heavy perimeter line where it crosses through them.
2. Either dish - Tack solder together the four side pieces to form a square. Sides will angle out.
3. Set the four joined sides on the worktable and place the base in the center. It will rest on the table. Solder in place inside and out.
4. Solder a #20 copper wire around the top edge of the project; bury the wire with solder.

**Spectrum Glass Color Suggestions**

- A. 291-61s Solid Champagne Opal
- B. 349-1s Pale Purple/White, wispy
- C. 349-6s Dark Purple/White, wispy

Plain Fluted Dish = 891-81s
